

Mobilise your workforce with...

...TotalMobile

TotalMobile is a mobile working system designed for any business or organization with people based outside the office. TotalMobile can streamline the way you work, improve the flow of information, reduce costs and improve efficiency.

Features

- Issue appointments and tasks to workers remotely
- Workers capture and transmit data directly from the scene
- Link workers with corporate information systems anywhere
- Provides remote workers with access to all relevant information through one mobile device
- Provides all the tools to manage and monitor remote workers
- Use Windows Mobile device capabilities (GPS, Bluetooth, imaging etc) in your information systems for time and location stamped images, employee tracking and on-site printing

Benefits

- Increase worker productivity (average 20%)
- Enable workers to make informed decisions remotely
- Reduces daily travel and saves fuel
- Reduce administration and paperwork to save time and money
- Meet duty of care with remote workers
- Improve accuracy by capturing data directly at the scene
- Poor network coverage never interrupts productivity

TotalMobile runs on all Windows Mobile devices and integrates seamlessly with back office systems and databases – complementing your IT infrastructure.
