

Receive and manage daily workloads and automatically report on progress with...

...TotalMobile Job Management

Job Management is the works order management application for TotalMobile allowing operatives to remotely receive jobs, update job status, record job completion and submit variations.

Features

- Issue work to workers remotely using existing work-order management systems
- Allows remote workers to receive, update progress and complete jobs without the need for regular office visits
- Empower workers to organise their own schedules
- Works as an independent application or in conjunction with other TotalMobile applications for enhanced functionality i.e. automatically record productivity with Timesheets and TeamTime

Benefits

- Optimised for task focused workers
- Complete more jobs per person
- Reduce administration workload
- Reduce travel and save time and fuel
- Track work and employees by location
- Provide up to the minute management information

TotalMobile Job Management runs on Windows Mobile devices and integrates with back office systems and databases - complementing your existing IT infrastructure.
