Information

Forms

Perform + submit
assessments

Helps caseworkers to...

- Perform assessments and receive instant results
- Remotely access critical patient/client information
- Organise daily appointments
- Review care history (care plans, diagnoses, medication etc)

Helps managers to...

- Control information access
- Get real time information inc. images
- Broadcast information and alerts
- Re-allocate resources in real-time
- View staff location via GPS on mapping software

All information can be enhanced with pictures, detailed with electronic forms and pinpointed with GPS.

All information is automatically synced and stored on office databases – giving managers up to the minute information and alerting the correct people to handle incidents.
