

Job Title: Android Developer

Location: Pilot Point, Belfast

Responsible to: Principal Software Developer

Main Purpose of Job

TotalMobile Ltd develop mobile working solutions for a wide range of markets in the Local Government, Healthcare and Private Sectors. Our product is designed to improve efficiencies, reduce costs and increase productivity and is multi-platform working natively on all major devices and platforms including iOS, Windows and Android. As an Android Developer within our Development team you will help to expand the capabilities of the TotalMobile platform and can expect to work with a range of technologies that push our mobile applications to the limit. You will be exposed to all stages of the product lifecycle and all aspects of our product set through our SCRUM agile development process.

Our entire Development team are currently developing with:

- iOS, Android, Windows, Windows Store
- Java, C#
- Android Studio, Xamarin, Visual Studio
- SQL Server, SQLite

We need an Android Developer with experience of developing highly functional native android applications.

The successful candidate will be passionate about software development and technology and will take pride in their work. You will be highly motivated with the ability to learn new technologies quickly.

Main tasks of Job

- To develop highly functional native Android applications that exceed customer expectations
- Fully participate in the SCRUM process
- To work with partners on product integration
- To provide support to other departments as and when necessary
- To continually improve skills and knowledge and keep abreast of changes in technology

- Actively suggest and trial new techniques and technologies
- Gain expertise in areas of the product and act as the 'go-to' person
- Any other duties as assigned

The above list is not exhaustive. You will be expected to perform duties as necessitated by your changing role and the overall business objectives of the Company, as directed.

Employee Specification

Essential

- Third level qualification in Computer Science or related discipline
- At least 1 years demonstrable experience of developing highly functional native Android applications
- At least 2 years professional software development experience
- Experience of determining user requirements and developing applications to match these
- Passionate about software development
- Strong analytical and problem-solving skills
- Ability to use a new technology and integrate with an existing product suite
- Actively suggest and trial new techniques and technologies
- Transferable programming skills with the ability to learn new skills quickly
- Mentoring skills (team members, customers)
- Extremely adaptable to change

Desirable

- Experience of SCRUM methodology
- Development experience of the following:
 - iOS
 - Windows
 - Windows Store Apps
 - SQL / SQLite

Circumstances

Applicants must be flexible and willing to work additional hours when necessary.

A full, clean driving licence is desirable but not essential.

Applicants may be asked to travel to customer sites.

To apply please email a CV to humanresources@totalmobile.co.uk with "Android Developer" in the subject line of your email.
