

Job Title: Software Tester

Location: Pilot Point, Belfast

Responsible to: Head of Testing and Release

Main Purpose of Job

TotalMobile Ltd develop mobile working solutions for a wide range of markets in the Local Government, Healthcare and Private Sectors. Our current product is designed to improve efficiencies, reduce costs and increase productivity and is multi-platform working natively on all major devices and platforms including iOS, Windows and Android. We're an innovative software company with an eye on the future and are moving into the analytics and IOT space and we have exciting opportunities to gain exposure to these technologies.

Totalmobile are seeking an excellent software tester with good technical skills to help uncover the capabilities of the TotalMobile platform. You can expect to work with a range of technologies and will be exposed to all stages of the product lifecycle. You could work across a number of areas and be testing web, mobile, scheduling or analytics software solutions. You'll be expected to be as careful about what lies behind the UI as you are about UX and as focussed on making the right thing as you are on making something that works well. The successful candidate will be very passionate about software testing and current and future technologies. You will be highly motivated with the ability to learn new software rules quickly.

Main tasks of Job

- Testing in whatever area you are assigned using a variety of test techniques and types
- Technical testing and profiling of AUT.
- Upgrade and maintenance of test environments and documentation
- Involvement in planning and software release activities
- Defect Management
- Any other duties as assigned

The above list is not exhaustive. You will be expected to perform duties as necessitated by your changing role and the overall business objectives of the Company, as directed.

Employee Specification

Essential

- Third level qualification
- Minimum 2 year's manual software testing experience in web or mobile testing capacity.
- Experience of using database and network profiling tools
- Experience of writing SQL queries
- Passionate about software testing
- Strong exploratory testing skills
- Excellent interpersonal and communication skills
- Strong awareness of current technology

Desirable

- ISTQB-ISEB Certified Tester Foundation Level
- Experience using automation frameworks esp Selenium / Appium
- Programming experience with Java/C#/ other OOP language
- Experience of e2e testing of complex software solutions.
- Understanding of Big Data, machine learning and IOT

Circumstances

Applicants must be flexible and willing to work additional hours when necessary.
A full, clean driving licence is desirable but not essential.
Applicants may be asked to travel to customer sites.

To apply please email a cover letter outlining how you meet the essential criteria and a CV to humanresources@totalmobile.co.uk with "Software Tester" in the subject line of your email.
