

Care at Home Services

Helping care providers deliver effective and efficient care plans within Care at Home Services

Care at Home services are critical to support adults and the elderly in their own homes to ensure they remain safe and keep their independence. Services include assisting with medication, preparing meals or bathing or dressing service users.

Challenges currently faced:

Ageing population

Life expectancy from birth: **Female 82.9 years / Male 79.2 years**

Driving factors on the rise of Care at Home Services:

- Ageing population
- Hospital lengths of stay are decreasing
- Advanced technology

- Environmental hazards
- Communication breakdown
- Lack of ability to share knowledge and gain visibility of care plans
- Constant pressure on care workers to deliver a quality service

Who receives Care at Home?

- Elderly
- People managing chronic conditions
- People recovering from acute illness

Benefits of Care at Home services:

- Ensures safety and wellbeing of those receiving care
- Encourages patient connectedness
- Reduces risk of complications

How we can help:

Totalmobile's solution ensures your organisation has full visibility over service capacity, the ability to efficiently create care plans and effectively schedule staff visits to enable the delivery of a more efficient homecare service, using a combination of our mobile, planning, scheduling and alerting capabilities.

Benefits

- Helps deliver a safer more compliant service
- Delivers a quality improved customer experience
- Generating greater capacity within your workforce
- Reduce operational costs throughout your organisation
